## Health and Well-being Board Indicator Dashboard

### Introduction

Established and hosted by local authorities, health and wellbeing boards bring together the NHS, public health, adult social care and children's services, including elected representatives and Local Healthwatch, to plan how best to meet the needs of their local population and tackle local inequalities in health.

Priority areas for Worcestershire identified by the Health and Well-being board are as follows:

- Good mental health and well-being
- Being active at every age
- Reducing harm from alcohol.

A number of indicators were chosen to monitor performance across these three priority areas.

A link to Worcestershires Joint Health and Well-being strategy for 2016 to 2021 can be found [here](#)

Full details of the Worcestershire Health and Well-being board committee can be found [here](#) including agendas, minutes and membership.

### Data Notes

Data contained within this dashboard is directly linked to the Public Health England Fingertips tool via API link, which are refreshed on a daily basis, where a direct API link could not be made static data tables exist and are updated monthly.

Below each figure is a note about whether an indicator is statistically significantly better, worse or the same compared with England.

### Useful Links and Documents

Public Health England - Public Health Outcomes Framework  
<https://fingertips.phe.org.uk/>

There are a selection of different profiles with data which are a rich source of indicators across a range of health and wellbeing themes that have been designed to support JSNA and commissioning to improve health and wellbeing, and reduce inequalities.

Last update: Apr-2019
