

Successful implementation and delivery of the SEND Strategy contributes to the delivery of above plans and strategies

OUTCOMES

Priority 1

A Person-centred Approach

Recognising the strengths and abilities of individuals and putting them at the centre of planning and decision making about their own care and support.

Priority 2

Integration and Operational Delivery

Working effectively with education, health and our care service providers, to improve the EHCP process to present a single, child centred plan and single support team experience.

Priority 3
Early Intervention

Supporting children to have the best start in life and ensuring that children, young people and their families can access help when they need it.

Priority 4

Preparation for Adulthood

A whole life approach, from birth to adulthood for children and young people with SEND, and their families

Priority 5

Workforce Development

Developing a workforce development programme, resulting in a confident multi-agency workforce that understand SEND, shares a vision for those with SEND and achieves good outcomes.

Overarching Vision

In Worcestershire we want all children and young people with special educational needs and/or disabilities to be truly seen and respected as individuals and be the best they can be.
