About this Risk Register

The following colour coding is used for the residual risk scores:

- Red ≥ 45 (07 risks)
- Amber ≥ 25 but < 45 (10 risks)
- Green < 25 (12 risks)

Risk scores can range from 0 to 100 and are derived by multiplying an impact score by a probability score as follows:

Impact = 0 (none); 5 (minor); 15 (moderate); 20 (major); or 25 (severe).

Probability = 0 (no chance); 1 (25% likely to happen); 2 (50:50); 3 (75% likely); or 4 (certain to happen).

The far-right column, Residual Risk Score, includes upwards or downwards arrows if the score has changed since the previous Risk Register (as at 19 09 2019 in this case).

In the far-right column, Residual Risk Score, the scores in brackets below the current score indicate what the previous score was if the score has changed since the previous Risk Register.

WPF 11 (Chief Financial Officer)	Failure to pool assets using LGPS Central Limited.	Lack of compliance with Ministry of Housing Communities & Local Government (MHCLG) requirements.	25	3	75	The Fund is a working member and shareholder of the LGPS Central pool. Each pool member has an equal share in the pool and the first Shareholders meeting and central committee have taken place. There is a Practitioners Advisory Form (PAF) with the pool's investment managers that meets monthly. The pool has a number of work streams: investments; client reporting; finance; responsible investment; and governance. Formal transition procedures are in place. The Fund will take legal advice before not pooling its assets and monitors the willingness of the pool to invest in the sort of assets that could have a positive impact on the Fund's future funding levels. The first transfer of Fund assets (in emerging markets) was undertaken in July. Transfer of the Fund's corporate bond assets is planned for Jan 2020.	20	2	40 A M B E R
