DISCLOSING INTERESTS

There are now 2 types of interests: 'Disclosable pecuniary interests' and 'other disclosable interests'

WHAT IS A 'DISCLOSABLE PECUNIARY INTEREST' (DPI)?

- Any **employment**, office, trade or vocation carried on for profit or gain
- **Sponsorship** by a 3rd party of your member or election expenses
- Any **contract** for goods, services or works between the Council and you, a firm where you are a partner/director, or company in which you hold shares
- Interests in **land** in Worcestershire (including licence to occupy for a month or longer)
- Shares etc (with either a total nominal value above £25,000 or 1% of the total issued share capital) in companies with a place of business or land in Worcestershire.

NB Your DPIs include the interests of your spouse/partner as well as you

WHAT MUST I DO WITH A DPI?

- Register it within 28 days and
- **Declare** it where you have a DPI in a matter at a particular meeting
 - you must not participate and you must withdraw.

NB It is a criminal offence to participate in matters in which you have a DPI

WHAT ABOUT 'OTHER DISCLOSABLE INTERESTS'?

- No need to register them but
- You must declare them at a particular meeting where: You/your family/person or body with whom you are associated have a **pecuniary interest** in or **close connection** with the matter under discussion.

WHAT ABOUT MEMBERSHIP OF ANOTHER AUTHORITY OR PUBLIC BODY?

You will not normally even need to declare this as an interest. The only exception is where the conflict of interest is so significant it is seen as likely to prejudice your judgement of the public interest.

DO I HAVE TO WITHDRAW IF I HAVE A DISCLOSABLE INTEREST WHICH ISN'T A DPI?

Not normally. You must withdraw only if it:

- affects your pecuniary interests OR relates to a planning or regulatory matter
- AND it is seen as likely to prejudice your judgement of the public interest.

DON'T FORGET

- If you have a disclosable interest at a meeting you must disclose both its existence and nature - 'as noted/recorded' is insufficient
- Declarations must relate to specific business on the agenda
 - General scattergun declarations are not needed and achieve little
- Breaches of most of the **DPI provisions** are now **criminal offences** which may be referred to the police which can on conviction by a court lead to fines up to £5.000 and disqualification up to 5 years
- Formal dispensation in respect of interests can be sought in appropriate cases.

Health Overview and Scrutiny Committee Wednesday, 19 July 2017, 10.00 am, County Hall

Membership

Worcestershire County Council Mr P A Tuthill (Chairman), Ms P Agar, Mr G R Brookes,

Mr P Grove, Prof J W Raine, Mrs M A Rayner, Mr C Rogers, Mr A Stafford and Mr R P Tomlinson

District Councils Mr T Baker, Malvern Hills District Council

Mrs A Hingley, Wyre Forest District Council Mr M Johnson, Worcester City Council Mrs F Smith, Wychavon District Council Mrs S Webb, Bromsgrove District Council Mrs N Wood-Ford, Redditch Borough Council

Agenda

Item No	Subject	Page No
1	Apologies and Welcome	
2	Declarations of Interest and of any Party Whip	
3	Public Participation Members of the public wishing to take part should notify the Head of Legal and Democratic Services in writing or by email indicating the nature and content of their proposed participation no later than 9.00am on the working day before the meeting (in this case 18 July 2017). Enquiries can be made through the telephone number/email address below.	
4	Confirmation of the Minutes of the Previous Meeting Previously circulated	
5	Constitutional Matters	1 - 2
6	Future of Acute Hospital Services in Worcestershire	3 - 6
7	Quality of Acute Hospital Services - Update	7 - 38

Date of Issue: Tuesday 11 July 2017

HEALTH OVERVIEW AND SCRUTINY COMMITTEE 19 JULY 2017

CONSTITUTIONAL MATTERS

Summary

1. To consider the selection of a Vice Chairman for the Health Overview and Scrutiny Committee (HOSC).

Background

2. Given that the statutory power of health scrutiny rests with the County Council, the Chairman of the HOSC is a County Councillor, Paul Tuthill. To reflect the partnership approach to health scrutiny in Worcestershire, the County Council's constitution states that the Vice Chairmanship should be allocated to one of the District Council members.

Next Steps

3. District Councillors are invited to select a Vice Chairman for the Health Overview and Scrutiny Committee. The nominee agreed by the District Council representatives will be formally appointed by Worcestershire County Council on 14 September 2017. In the event that the District Councillors cannot agree on an appointment, the County Council will appoint one of the six District Councillors to the position at the Worcestershire County Council on 9 November 2017.

Worcestershire County Council's Constitution

HEALTH OVERVIEW AND SCRUTINY COMMITTEE 19 JULY 2017

FUTURE OF ACUTE HOSPITAL SERVICES IN WORCESTERSHIRE

Summary

- 1. The Health Overview and Scrutiny Committee (HOSC) is to receive an update on the final decision on the Future of Acute Hospital Services in Worcestershire and the chosen clinical model for acute hospital services
- 2. Representatives from the Future of Acute Hospital Services in Worcestershire (FoAHSW) Programme Board will be present at the meeting.
- 3. The decision on the future clinical model for acute hospital services in Worcestershire is due to be taken by the Governing Bodies of NHS Redditch and Bromsgrove Clinical Commissioning Group (CCG), NHS South Worcestershire CCG and NHS Wyre Forest CCG, at a Committee in Common on 12 July 2017.
- 4. The Governing Bodies will consider the Decision Making Business Case, which follows the public consultation on the Future of Acute Hospital Services in Worcestershire Programme, and make recommendations on how future services should be delivered.
- 5. A verbal update from the 12 July CCG Committee in Common will be provided to HOSC members at this meeting.

Background

- 6. Now in its final stages, the HOSC has maintained a regular overview of the review of acute hospital services in Worcestershire, which was initiated in 2012, prompted by a number of needs, including a lack of doctors specialising in certain services, national evidence that certain services can be provided to a higher standard if they are centralised and the increasing challenge of meeting the needs of an ageing population with more complex and long-term conditions. Minutes of previous HOSC meetings are detailed in the background papers to this report.
- 7. Public consultation on the proposals ran from 6 January to 30 March 2017. During the 12 week consultation the Clinical Commissioning Groups held conversations with 1,885 people at 61 drop in sessions and events. An online and paper survey was completed by 3,206 people and letters and emails were received from 694 individuals and organisations. The CCGs have considered all the responses and have made recommendations in the Decision Making Business Case in response to concerns raised.

8. Following the Committee in Common of the three Clinical Commissioning Groups the Future of Acute Hospital Services in Worcestershire will move into the implementation phase and be led by Worcestershire Acute Hospitals NHS Trust.

Purpose of the Meeting

- 9. HOSC Members are asked to:
 - Note the verbal update on the final decision on the Future of Acute Hospital Services in Worcestershire
 - Consider the scrutiny of the implementation phase.

10. Surrounding area Health Scrutiny Committees have also been invited to attend the meeting, following the HOSC's agreement on 26 September 2016.

HEALTH OVERVIEW AND SCRUTINY COMMITTEE 19 JULY 2017

QUALITY OF ACUTE HOSPITAL SERVICES - UPDATE

Summary

- 1. The Health Overview and Scrutiny Committee (HOSC) is to receive an update from Worcestershire Acute Hospitals NHS Trust (the Trust) on the quality of hospital services, and in particular, progress to address improvements required by the Care Quality Commission (CQC), England's independent regulator of health and social care.
- 2. The Trust has been in special measures since November 2015 and remains so, following publication of the CQC's latest inspection report (in June this year), which relates to visits to the Trust's hospitals in November and December 2016.
- 3. The inspection report gives an overall rating of 'inadequate' and recommends that the Trust remains in special measures until further review.
- 4. Representatives from the Trust's Board have been invited to attend the meeting.

Background

- 5. The HOSC has requested regular updates during 2015 and 2016 on the quality of acute hospital services as part of its role to monitor the impact of ongoing pressures experienced by many hospital trusts, such as increased activity, greater complexity of patient needs and financial constraints. The Minutes of HOSC meetings on 27 April and 16 November 2016 will be particularly useful to HOSC members and links to these documents are included in the background papers.
- 6. Within Worcestershire, a further pressure has been the delay in finalising a reconfiguration of acute hospital services, which has resulted in an on-going period of uncertainty for the Trust.
- 7. The CQC inspects services by asking five key questions:
 - Is it safe?
 - Is it effective?
 - Is it caring?
 - Is it responsive?
 - Is it well-led?

A table of ratings for each key question against services, can be found at page 24 of the June 2017 CQC inspection report, which is available on the CQC website: http://www.cqc.org.uk/sites/default/files/new_reports/AAAG5822.pdf

- 8. Overall inadequate ratings are given to:
 - Urgent and Emergency Services

- Medical care
- · Services for children and young people
- Outpatients and diagnostic imaging.
- 9. End of life care is rated as 'good', and each service is rated as 'good' against the key question 'Is it caring?'.

Scrutiny to Date

- 10. The Trust's updates to the HOSC have focused on the initial inspection findings and progress to date, priority work streams and plans, as well as the recent temporary emergency changes to services which needed to be made on patient safety grounds by the Trust, under emergency powers in November 2015 all births from the Alexandra Hospital in Redditch were moved to the Worcestershire Royal Hospital because of a severe shortage of neonatal nurses, and from September 2016, Inpatient Paediatric Services were centralised at Worcestershire Royal Hospital also.
- 11. Whilst acknowledging the innovative work in hand to progress the Patient Care Improvement Plan since the CQC's inspection, the HOSC's discussions have raised a number of concerns, including the impact on national performance targets, the need for clear communications to inform, reassure the public and dispel rumours, the need for better systems to improve patient waiting times and discharge, staffing and recruitment, capacity at Worcestershire Royal Hospital, significant financial pressures, the onset of pressures from seasonal winter illnesses and transportation between hospital sites.
- 12. Concern was also expressed about the need for stability and the negative impact of the on-going delay to the reconfiguration of acute hospital services in Worcestershire.
- 13. More recently, on 26 September 2016, HOSC members discussed Radiology Services with the Trust, to understand actions being taken to address reports of a backlog of Radiologist reports on X-rays and to seek assurances that lessons had been learned.

Purpose of Meeting

- 14. HOSC members are invited to consider and comment on progress being made to address the quality of services at the Trust.
- 15. In doing so, potential areas of enquiry may include:
 - priorities for improvement
 - how progress is being driven and managed since the 2016 inspections
 - main issues or obstacles to improvement
 - progress with bringing stability to the leadership team
 - role of partnership working
 - managing the impact on patients, families and staff.
- 16. Following the discussion, HOSC Members are asked to consider whether any further information is required and identify any specific elements for potential future scrutiny at this stage.

Ref: MM/RB/5618

20 June 2017

Dear colleague

Care Quality Commission reports following inspection of Worcestershire Acute Hospitals NHS Trust in November and December 2016

I am writing to let you know that the Care Quality Commission is today publishing its reports following its inspection of our hospitals in November and December 2016. The overall rating for the Trust is 'inadequate' and the CQC is recommending that we remain in 'special measures' until further review. The Trust has been in 'special measures' since November 2015.

We are disappointed with the CQC's findings, but we fully accept them and are determined to put things right. We are sorry we have let down our patients, their families and carers by not meeting the quality standards they rightly expect. We want all our patients to get the best care possible and regret that this isn't always happening.

One of the problems identified by the CQC was leadership; for many years the Trust's senior posts were filled on an interim basis. We now have a new and permanent leadership team in place, and have made a new start in building on and strengthening the Trust's improvement programme. We are committed to making the changes needed happen as quickly as possible so we can consistently deliver high quality standards for patients across all our services. For example, we have:

- Updated our plans for dealing with significant peaks in the number of patients we see, particularly so patients have a better experience at busier times
- Updated our policy and the way we ensure male and female patients are treated in separate areas when clinically appropriate to do so, making sure we focus on their privacy and dignity
- Improved our systems and processes to make sure medicines are stored correctly and all staff receive full training around administering medicines safely
- Ensured we learn from mistakes when they do occur; with robust systems in place for reporting incidents, and improved induction and training for staff – as per best practice in other hospitals
- Ensured staff have received appropriate levels of training to care for the specific needs of children
- Ensured patients with fractured hips quickly receive the appropriate surgical treatment for their condition in our theatres which improves their experience and their outcomes from surgery
- Introduced a system for senior nurses when they lead audits and reviews on professional standards, to make sure these are consistent across the Trust
- Launched a Trust wide dementia strategy to support staff to better care for the needs of patients with dementia

- Ensured patients with urgent gynecological problems are fast tracked so they are seen quickly and offered the appropriate treatment as soon as possible for their condition
- Implemented new processes to our electronic systems, working with the Regional Safeguarding Board to ensure appropriate levels of safeguarding is in place for children in our care.

I am pleased that the reports acknowledge that we are a caring organisation, rating care across our hospitals as 'good', and our end of life care as 'good'. The inspectors said that services were provided by dedicated, caring staff, and that patients were treated with kindness, dignity and respect and were provided with the appropriate emotional support.

Patients should continue to attend our hospitals for appointments, operations and treatment as planned. We have written separately to patients to explain the situation and allay any concerns they might have. It is aspects of our systems, processes and culture that we must rapidly address. Our staff continue to deliver compassionate care to the thousands of patients who use our services every day. Anything you can do to reinforce the message among your networks that patients should continue to come to our hospitals would be helpful.

We know we can't make all the necessary improvements alone as our hospitals and services are part of a wider health system. So we will continue working together with our partners in the NHS and social care to find new ways to develop safe, high quality, and affordable health and care services for local people.

We still have some way to go before we are delivering the quality that you and our patients expect. We are determined to move forward with pace and focus so we can consistently deliver high quality standards for patients across all our services.

Thank you for your ongoing interest in our organisation and our services. Please do make contact if you would like to discuss further. I will continue to keep you updated on our progress over the coming weeks and months. In the meantime, you can link to the reports and see further information on our website www.worcsacute.nhs.uk.

Yours faithfully

Michelle McKay Chief Executive

2 QIP Final version 20170706

Background & Summary

CQC Inspection July 2015

The Chief Inspector of Hospitals visited the Trust in July 2015 and published the findings in December 2015. The Trust was rated overall as 'Inadequate'. The Trust had had a previous unannounced and focussed inspection of ED in March 2015 which resulted in a number of Section 29 Warning notices and weekly monitoring returns to the CQC of ED triage times.

CQC Unannounced Inspection July 2016

Following concerns raised directly to the CQC by a whistle-blower the CQC carried out an unannounced inspection of radiology services. This resulted in a section 31 notice and the trust has remained on weekly monitoring since that time.

CQC Re-Inspection November 2016

The Trust had its scheduled re-inspection 22 – 25 Nov 2016 followed by a number of unannounced visits. Following this inspection, the level of concern was such that a Risk summit was called by NHSI on the 22 Dec 2016. Whilst the focus of this summit was on the safe care of patients in Urgent Care the CQC raised a

Overall rating Nov 2016	Inadequate	
Are Services Safe?	Inadequate	
Are Services Effective?	Requires Improvement	
Are Services Caring?	Good	
Are Services Responsive?	Inadequate	
Are Services Well-led?	Inadequate	

number of other areas of concern which included safe medicines management, care of patients on CPAP in paediatrics and safe staffing and monitoring of escalation areas. A follow up risk summit was held on 18 Jan 2017. The Trust then received a section 29A Warning Notice from the CQC outlining concerns at all three sites. The final report from this visit was published on 20 June 2017. This showed a decline in the overall Responsive domain rating from Requires improvement to Inadequate.

CQC Unannounced Inspection April 2017

The CQC undertook an unannounced inspection to review progress against the Section 29A Warning Notice in April 2017 followed up by interviews with the Executive Team and staff focus groups. On this inspection they did not find sufficient evidence to demonstrate that the requirements of the Warning Notice had been met. The report from this visit is due to be published in July 2017

Following on from receipt of the Section 29A Warning Notice a Quality Improvement Plan (QIP) was developed and an internal monitoring group (the Quality & Safety Improvement Group) was established chaired by the Chief Executive. Any outstanding actions from that QIP have either been moved into this updated QIP presented below or into business as usual.

Who is Responsible?

- Our initial actions (focusing on the 'Must' and 'Should Do's') to address the Section 29A Warning notice of January 2017 were agreed by the Trust Board in March 2017
- Trust leaders have developed this Quality Improvement Plan which was ratified by the Trust Board on 5 July 2017, provided to the CQC on 6 July and reviewed at the Quality Oversight Group meeting on 10 July.
- The Chief Executive is ultimately responsible for implementing actions in this document. The Chief Medical Officer, Dr Suneil Kapadia provides the executive leadership for safety and clinical effectiveness and the Chief Nurse, Vicky Morris provides the executive leadership for Quality, CQC regulation and compliance.
- The Trust works closely with NHS Improvement, specifically the Improvement Director allocated to the Trust, Cathy Geddes and the Regional Team, who ensure delivery of the improvements and oversee the implementation of the Quality Improvement Plan.
- Ultimately the success in implementing the recommendations of the Quality Improvement Plan will be assessed by the Chief Inspector of Hospital upon re-inspection of our Trust
- If you have any questions about progress on implementation, contact Vicky Morris at: Vicky.morris@nhs.net

How we will communicate our progress to you

We will update this progress report every month while we are in Special Measures and the Quality Improvement Plan will be available for access following approval by the Quality Oversight Group and the Trust Board.

Chief Executive Name: Michelle Mckay	Signature:	Date:

The CQC findings - A summary

This section provides a summary of the CQC's findings about services at Worcestershire Acute Hospitals NHS Trust. Summary report and full CQC report can be found on the Worcestershire Acute Hospitals Web Site www.worcsacute.nhs.uk or the CQC website: www.worcsacute.nhs.uk or the CQC website:

General

There had been deterioration in the quality of services provided since the previous inspection in 2015 with a decline in the Responsive domain from "Requires Improvement" to "Inadequate". The trust was rated as Inadequate overall and across all three hospital sites. It was rated as Inadequate for being safe, responsive and well-led, Requires Improvement for being effective and Good for being caring. End of Life Care was rated as Good on both the Alexandra Hospital and Worcestershire Royal Hospital sites and Critical Care services were rated as Good at the Alexandra Hospital site.

1. Ensuring Services are safe

The CQC rated the safety of our services as 'inadequate'. They found a culture of reporting, investigating and learning from incidents but inconsistencies in external reporting for serious incidents. Staffing within the Emergency Department at the Worcestershire Royal site was not in line with national guidance; however, most other areas had adequate staff to ensure patients received safe care and treatment. Management and storage of medicines was poor with a lack of a robust process being in place for monitoring and reporting fridge temperatures. Too many patients were receiving care in the corridors of our Emergency Departments, particularly at the Worcester site, sometimes being placed near exit doors and out of the line of staff's sight.

2. Ensuring Services are effective

The CQC rated the effectiveness of our services as 'requires improvement'. The Trust mortality indicators (HSMR and SHMI) at the time were both above the national average. Our performance in national audits was poor with some areas performing significantly worse than the England average. Robust action plans were not in place to ensure improvement and there was no standardised approach to local audits. Mandatory training for staff was below the Trust standard in most areas and not all staff understood their obligations under the MCA and DOLS, meaning our most vulnerable patients were potentially at a higher risk of not receiving all the care they need.

3. Ensuring Services are caring

The CQC rated the caring of all our services as 'good'. They observed staff delivering compassionate care, involving patients in decision making, whilst providing good emotional support to patients and people close to them. However, the privacy and dignity of patients being cared for in corridors within the ED departments was often compromised.

4. Ensuring services are responsive

The CQC rated the responsiveness of our services as 'inadequate'. The Trust was consistently failing to meet the national performance standards (Emergency Access; Cancer; Referral to Treatment and Diagnostics) with the flow of patients through the hospital being poorly managed. However, the Trust did have systems in place to ensure that patients living with dementia had safe care that was tailored to their needs. Staff could also demonstrate good examples of where they had altered care to ensure patients beliefs and diverse needs were met.

5. Ensuring services are well led

The CQC rated the Well Led aspect of the Trust as 'inadequate'. They had significant concerns about the interim nature of the Board at the time and felt that the executive team did not have effective processes to ensure communication was embedded from ward to board. A revised framework for governance and assurance had been put in place but the CQC felt that it was not operating effectively and so the board did not have clear oversight of the risks affecting the quality and safety of care for patients. The CQC also raised concerns about reported high rates of bullying of staff from patients, relatives and other staff. In addition they noted the lack of BME staff employed in senior posts within the Trust.

Developing our Improvement Plan

The six themes within our plan are:

Each section of our improvement plan outlines the CQC findings, the improvement projects identified and how we intend to measure success.

Quality Improvement Plan Governance

It is important that we ensure robust governance arrangements through which the quality improvement plan (QIP) will be managed. Immediately following the publication of the Section 29A Warning Notice in January 2017, regular Quality and Safety Improvement Group (QSIG) meetings were established with Divisional representation to monitor delivery against that Improvement Plan. This meeting is chaired by the CEO. The Trust will build on that meeting and will now become the Quality Improvement Board (QIB) which over time will develop into the group that monitors delivery of all Improvement Programmes across the Trust.

The QIB reports into the Quality Governance Committee which is a Board Committee.

Responsibilities of: Divisional Leads/ Trust Leads/ Staff with Actions

- The Divisional triumvirates / Trust Leads are responsible for ensuring that the QIP actions are achieved and the plan is updated on a regular basis, and any issues escalated appropriately and within a timely manner.
- The QIP must be monitored on a regular basis by the Divisions/Trust Leads to ensure it remains on track, pro-actively identifying slippage and mitigating actions to rectify as soon as possible.

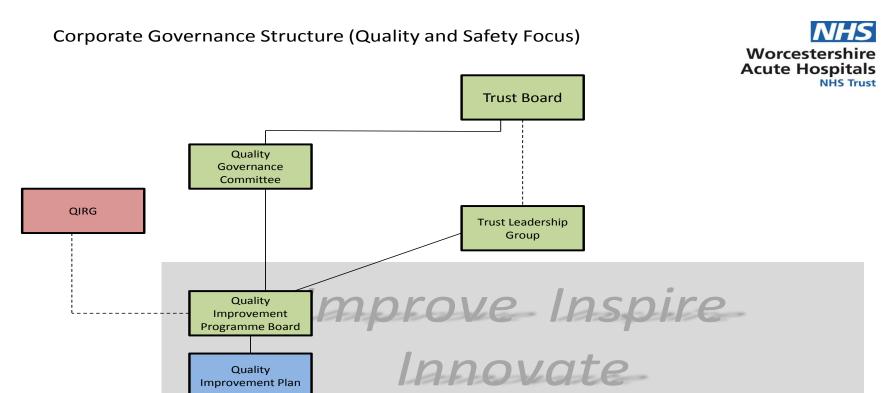

Responsibilities of: Executive Leads

- The Lead Executive for each 'concern' identified is responsible for ensuring that the identified outcome, KPI (and associated trajectories) and action are appropriate. They are responsible for signing off their relevant parts of the QIP.
- A Lead Executive will be allocated responsibility for overseeing the implementation and impact of each of the 6 work streams (Deteriorating Patient, Operational Improvement, Governance, Patient Experience and Engagement, Safe Care, Culture & Workforce)
- The Executive leads will provide both support and challenge to the Divisions/ Trust leads at the relevant governance meeting if concerns are identified, or the delivery of actions are delayed to meet the stated outcomes. Divisions/Trust leads will be requested to identify mitigating actions to bring the delivery back on track.

Responsibilities of: Programme Management Office

• Will provide support to the Divisions / Trust Leads to ensure that the QIP is co-ordinated appropriately working closely with the Deputy Chief Nurse (Quality) who has operational oversight of the plan.

How we will implement this plan

The governance section above outlines the committee structure responsible for ensuring delivery and assurance against the QIP. This section identifies how the trust is going to operationalise the delivery of the plan.

The Trust has identified one of its substantive Executive Directors to take on the lead responsibility for Quality Improvement across the organisation. This is the Chief Nurse. The Deputy Chief Nurse (Quality) will be accountable to the Chief Nurse and will oversee the delivery of the Improvement Plan, utilising a programme management approach.

Each of the 6 themes identified within the programme (Deteriorating Patient, Operational Improvement, Governance, Patient Experience and Engagement, Safe Care, Culture and Workforce) has been allocated an executive lead that will be accountable for the successful delivery of the desired outcomes documented within their section of this plan to the Quality Improvement Board. This Group will be chaired by the Chief Executive Officer and supported by the Chief Nurse. This group currently meets fortnightly and it is the aim of the Trust that this Group will be a long-standing group which will be responsible for monitoring the continuous quality improvement across the organisation beyond the next CQC inspection.

Supporting the implementation of the improvement plan with be the development of a three year strategy within the Trust which will be delivered to support and educate staff in utilising improvement science to implement and monitor small and large scale change; to utilise staff's expertise (such as that of consultants and other staff who have a special interest in improvement and who have skills in mapping, implementing lean methodology etc.) to support staff implement change in practice and to utilise staff's knowledge of particular topics, such as aspects of functional management, leadership, change management etc. as well as offering facilitation, coaching and mentoring skills to all levels of staff within our organisation.

The Plan – Deteriorating Patient.	Executive Lead, Chief Medical Office	r
-----------------------------------	--------------------------------------	---

What the CQC found

Patient risk assessments were not fully completed on admission and generally not reviewed at regular intervals throughout the patient's stay in hospital.	The risk of patients deteriorating was not always appropriately managed particularly for those patients moved to outlying wards.
Lack of clear oversight of the deterioration of patients and the inaccuracies in completion of National Early Warning Score	The ED at the Alexandra Hospital could not ensure that there was always a senior doctor available who was qualified to resuscitate children. Staff had not been trained to use a new system to help staff recognise when a child's condition was deteriorating.
Inaccuracies in completion of the Paediatric early Warning Scores and failure to escalate appropriately	Robust and appropriate systems were not in place for carrying out VTE assessments which contravened NICE guidance.
The Trust was performing worse than expected for two mortality indicators (SHMI and HSMR)	The critical care team were able to ensure safety across the county wide service by transferring skilled staff to assist with the management of patient care according to need.
Patients were cared for in environments that did not always have the equipment to safely care for a deteriorating patient.	Not all equipment had been safety tested and the emergency neonatal trolley in the delivery suite was not always checked properly.

Our plans to improve

- 1. Improve the morbidity and mortality processes across the Trust to enhance shared learning and to reduce unnecessary harm to patients. We will achieve this through the successful implementation of the following:
- Introduce standardised primary & secondary mortality reviews across the Trust based on The Learning from Deaths Guidance (NHSE 2017), reporting to the Board as per guidance.
- Enhanced shared learning from morbidity & mortality reviews, by reviewing the current Trust process to ensure that every death is reviewed by the appropriate clinical teams (not just those patients at the end of their life, or from the DNACPR audits) and through the appointment of an additional clinical lead responsible for leading on mortality reviews.
- Reviewing and strengthening the Trust-wide Mortality Review Group.
- Review the existing VTE project plan and strengthen this based on best practice learned from elsewhere.

- 2. Improve the accurate recording of NEWS and PEWS and ensure appropriate escalation happens when needed. We will achieve this through the successful implementation of the following:
 - Strengthen the programme of audits to monitor compliance with the NEWS and PEWS policies, supported by an on-going training programme.
 - Roll out the use of SBAR as the communication tool between clinicians for requesting support for deteriorating patients and handover.
 - Standardise and implement Safety Huddles across all wards.
 - Develop the business case for procuring a mobile clinical system to enable real time patient monitoring and escalation.
- 3. Improve the early detection and timely treatment for patients admitted with Sepsis. We will achieve this through the successful implementation of the following:
 - Review of the work programme of current Sepsis Improvement Group, ensuring all actions are going to deliver the improvements required.
 - Development of a business case to support the additional resource required to deliver improvements.
 - Embed a systematic approach towards the prompt identification and appropriate treatment of life-threatening infections, while at the same time reducing the chance of the development of strains of bacteria that are resistant to antibiotics.
 - Timely identification of sepsis in emergency departments and acute inpatient settings.
- 4. Ensure robust individual patient and environmental risk assessment processes are in place that will ensure patients are cared for in the right place, by the right person who has the right equipment to support care delivery.

This will be monitored at daily bed meetings and audited quarterly.

We will know when we have succeeded when we have demonstrated:

Outcomes	*Theme Achievement Date
HSMR and SHMI rates are in line or better than the national average	
Compliance with the Sepsis 6 bundle is in line or better than national average	31/08/18
There will be a reduction in unexpected Cardiac arrests from the 16/17 baseline	
There will be a reduction in unplanned admissions to our ITU's from the 16/17 baseline	

^{*}Each project will have rolling milestones and Key Performance Indicators (KPI's) that will reported on monthly

What the CQC found

Lack of privacy and confidentiality for patients being cared for on trolleys on the corridors of the emergency department at Worcestershire Royal	The flow of patients into and through the hospital was not well managed across the Trust
Hospital and the Alexandra Hospital.	managed across the Trust
Medical patients on non- medical wards were not always effectively managed.	The Trust was not meeting the cancer 62 day standard of 85%
Patients who were moved were not always reviewed to check the move	There was a high volume of patients moving between wards overnight.
was appropriate.	
The amount of time patients spent in ED waiting for treatment was	Only 50% of ambulance patients were handed over to ED staff within
consistently worse than expected standards.	15 minutes.
Patients are waiting too long from the decision to admit until being	The admitted referral to treatment time was consistently below the
admitted so patients are not accessing care in a timely way.	Trust standard of 90%

Our plans to improve

- 1. Implementation of the Trust wide Flow project. We will achieve this through the successful implementation of the following:
- Implementation of Red 2 Green 7 days No Delay project to speed up flow through the hospitals.
- Robust daily reviews of "stranded" patients to ensure the right care delivered in the right place.
- Length of stay review & Implementation of the 6A 's of managing emergency admissions project with the support of ECIP
- Bed management review
- Establishment of a Frailty Unit including a Frailty model across the health economy
- Increase the number of ambulatory care pathways.
- New capital build aligned to current Emergency Department increasing capacity and improve streaming.
- Review of the Paediatric Assessment Unit and urgent care pathways to ensure there is sufficient capacity.
- Review of SOPs for placing patients into escalation areas, ensuring they cover off risk assessments, staffing and equipment checks.

- **2** Capacity and Demand analysis and job planning to ensure we right size capacity and match resources required. We will achieve this through the successful implementation of the following projects:
- Capacity and Demand analysis June 2017
- · Review of job plans for all Consultants July 2017
- Bed and theatres right sizing once Capacity and Demand analysis complete
- Review of Clinical Nurse Specialist roles and job plans September 2017
- Medical bed modelling supported by Intensive Support Team
- Review of Paediatric Urgent care pathway and staff.
- 3 Increase capacity to ensure delivery of Cancer and RTT improvement trajectories. We will achieve this through the successful implementation of the following:
- Approval of 7 business cases to increase the clinical workforce; outsource where required and run additional sessions internally.
- Review of Waiting List processes ensuring strong Divisional oversight

We will know when we have succeeded when we have demonstrated:

Outcomes	*Theme Achievement
	Date
Achievement of the improvement trajectory for the Emergency Care Access standard	
Achievement of the improvement trajectory for Cancer waiting standards.	
Achievement of the improvement trajectory for Diagnostic wait standard	
Achievement of the improvement trajectory for 18weeks RTT standard	31/03/18
25% of discharges before midday	
Established Estimated Date of Discharge (EDD) for all patients	
Red 2 green actions standardised in all wards	
All patients streamed from front door into the most clinically appropriate setting – Right Patient, Right Ward, 1st Time	
A consistent reduction in the Delayed Transfers of Care (DTOC) to 3.5%	
Ambulance handovers consistently complete handovers within 15mins	
Ensure maximum theatre utilisation, in order that the number of cancelled operations reduces in line with the England	
average	
A consistent improvement in A&E FFT results	

^{*}Each project will have rolling milestones and Key Performance Indicators (KPI's) that will reported on monthly

The Plan - Governance. Executive Lead- Chief Nurse

What the CQC found

Nursing documentation was poorly completed.	Performance in national audits was in some areas significantly worse
	than the England average with limited evidence of action plans to
	address all areas for improvement.
There was a culture of reporting, investigating and learning from	There was no standardised approach to completion of audit.
incidents throughout the Trust. However, not all incidents that were	
required to be reported externally as "serious" were correctly classified	
and externally reported.	
The Executive Team did not have effective processes to ensure	Although a revised framework for governance and assurance was in
communication was embedded from Ward to Board	place, it was not operating effectively and the board did not have clear
	oversight of the risks affecting quality and safety of care for patients.
There was not an appropriate system in place to support the fit and	Risk registers were not fully populated with risks at Divisional level.
proper person's requirements.	

Our plans to improve

- 1. Enhance our Quality and Corporate Governance, so there no longer exists a gap between the clinical areas and the board. We will achieve this through the successful implementation of the following:
 - Implement the outstanding recommendations from the Buddy Trust Governance Review
 - Review the Divisional Governance meetings and implement changes required in order to ensure a consistent approach.
 - Commission external expert advice on Corporate Governance and implement recommendations.
 - Ensure a robust process is in place for meeting the Fit and Proper Person guidance.
 - Undertake the NHSI Well Led Governance Review.
- 2. Strengthen our Risk Management processes, so there no longer exists a gap between the clinical areas and the board. We will achieve this through the successful implementation of the following:
 - Implement the outstanding recommendations from the Buddy Trust Governance Review
 - Roll out a programme of training on risk management both to the Board and operational teams.

- Review and update the BAF and Risk Management Strategy.
- Review Risk Registers via the Trust Risk Management Group.
- 3. Strengthen the Trusts ability to transform the safety and quality culture across the organisation. We will achieve this through the successful implementation of the following:
 - Undertake a Trust wide Safety Culture questionnaire.
 - Introduce a Trust-wide transformation and PMO team who will support the delivery of this overarching piece of work, focusing
 on long term continuous improvement
 - Work with the West Midlands Academic Health Science Network (WMAHSN) to support an improvement in staffs understanding of improvement methodologies.
 - Review the Trusts Incident reporting Policy and training programme to ensure increased awareness and knowledge amongst staff.
- 4 Strengthen the outcomes from local & national audits, demonstrating learning by continuously improving compliance. We will achieve this through the successful implementation of the following:
 - Establishment of a system to co-ordinate results from audits, the resulting action plans and evidence of implementation and compliance which will be monitored via the Trust Clinical Governance Group.

We will know when we have succeeded when we have demonstrated:

Outcomes	*Theme Achievement Date
Our quality & Corporate governance systems are robust and can demonstrate a dynamic flexible process which moves seamlessly from ward /department to board and back again	
Our risk management systems are robust, and can demonstrate a dynamic responsive oversight and approach to risks identified at all levels within the organisation, strengthening board oversight of risk.	31/03/18
An enhanced safety and improvement culture which reaches all levels of staff across the organisation and focuses on: learning, sharing the learning, continuous quality improvement and the use of appropriate information to evidence performance against agreed success metrics (Clinical effectiveness)	
100% compliance with the Fit and Proper Persons Process (FPP) by 30/06/17	

^{*}Each project will have rolling milestones and Key Performance Indicators (KPI's) that will reported on monthly

The Plan – Patient Experience and Engagement. Executive Lead- Chief Nurse

What the CQC found

Feedback from patients and those who were close to them was positive about the way staff treated them. Patients were observed	Close working between the specialist palliative care team and ED staff was observed at the end of life
being treated with dignity, respect and kindness.	
Relatives of patients in critical care had access to facilities to enhance	The need for emotional support was recognised and specialist and
their stay on the unit including overnight accommodation.	spiritual support was provided.
Managers did not have clear oversight of mixed sex breaches or the	Pain in children attending the MIU was not always managed effectively.
need to report them in line with national guidance.	
The NHS FFT had been suspended in children's clinics (KTC) since	Patient's privacy and dignity was often compromised for patients being
the service reconfiguration. Patient's feedback could not be used to	cared for in the Emergency Department corridors.
monitor and improve services.	

Our plans to improve

- 1. Reduce the number of mixed sex breaches and ensure robust reporting mechanisms are in place. We will achieve this through the successful implementation of the following:
 - Development of a Standard Operating Procedure (SOP) for monitoring and reporting mixed sex breaches.
 - See Section 2 on Operational Improvement for linked actions that will reduce MSA breaches
- 2. Ensure all Divisions have robust processes in place to capture patient feedback in a meaningful way and involve patients more in our improvement journey. We will achieve this through the successful implementation of the following:
 - Development and implementation of a Patient Engagement Strategy that focusses on actions to increase real time patient feedback, strengthens the patient voice at the Board and engages Patients and carers in the Trust's improvement journey.
 - Review of the current Complaints policy ensuring Divisions become more responsive to concerns raised and learn from the patient feedback.
 - Improve the reporting of complaints to the Board ensuring more in depth analysis of complaints and compliments received.
 - Review of current patient feedback mechanisms, exploring options to improve.

- 3. Ensure all staff that care for children are appropriately trained to identify and manage their pain. We will achieve this through the successful implementation of the following:
 - Undertake a training needs analysis and roll out of competency based training.
 - Audit effectiveness of training including Parent and Child feedback.
- 4. Improve flow and streaming in order to reduce the number of patients cared for in the ED corridor at Worcestershire Royal Hospital and ensure appropriate facilities are in place to provide privacy for patients within the department. We will achieve this through the successful implementation of the following:
 - See Section 2 on Operational Improvement for actions that will support this.
 - Deliver on the planned capital build for the Emergency Department at Worcester Royal site, thereby increasing capacity within the department and improving the ability to provide care in appropriate settings.

We will know when we have succeeded when we have demonstrated:

Outcomes	* Theme Achievement Date
Achievement of Trust standards in complaint response times	
FFT results that are in line or better than the national average	31/03/18
An improvement in the 17/18 patient survey results against the 16/17 results	
Active engagement of patients in a range of groups and improvement projects	
Patients are not routinely cared for in the corridors of the Emergency Departments	
Audits show children's pain is being appropriately managed	
Patients are not cared for in a mixed sex environment	

^{*} Each project will have rolling milestones and Key Performance Indicators (KPI's) that will reported on monthly

The Plan - Safe Care. Executive Lead - Chief Medical Officer

What the CQC found

The level of safeguarding children's training was low and not compliant with national guidance.	Staff were unaware of FGM and child sex abuse. There was a risk staff would not recognise when a child was being abused or exploited.
Medicines management was poor with medicines that required cool storage being stored in fridges which were either below or above the manufacturers recommended temperature.	There was inadequate review and document control of protocols for standard x-ray examinations.
Emergency medicines were not protected from tampering and poor practice was observed relating to staff signing for controlled drugs in the Endoscopy dept. at KTC.	Not all staff had undertaken relevant mandatory training. This included safeguarding, Mental Capacity Act 2005 and Deprivation of Liberty Safeguards.
Wards and clinical areas were visibly clean, however, some poor adherence to the trusts infection, prevention and control procedures was observed.	Patient's records were not always stored securely.
Aging and unsafe equipment was used in radiology departments across the trust that was being inadequately risk rated.	Assessments for paediatric patients' requirement of 1:1 care from a mental health nurse were not always undertaken and care was not consistently provided by a member of staff with appropriate training.
Patients with mental health needs were not always cared for in an appropriate environment within ED.	There was not a robust, consistent process in place for Harm Reviews

Our plans to improve

- 1. Improve the management and security of medicines. We will achieve this through the successful implementation of the following projects:
- Improving the way that the Trust learns from medication errors by: a) ensuring that all Divisions include monthly reviews of all medication errors reported from Medicines Optimisation and Divisional Governance processes through to the Clinical Governance Group on a quarterly basis and b) distribution of a regular medicines management newsletter
- Enhanced staff knowledge regarding medication issues, as a result of implementation of '5-minute pharmacy alerts' as screen savers which outline medication issues and learning
- Applying the principles of the 'Hospital pharmacy transformation plan' as part of the Carter Efficiency Programme
- Conduct a review of all medicines and fluid storage areas ensuring safe and secure storage is provided.
- Review the medicines policy to ensure it reflects a risk based approach to safe and secure handling in line with national guidance (Duthie report)

- 2. Ensure equipment is well maintained, stored and safety checked, focusing particularly on: Radiology equipment, Resuscitation Trolleys & Fridge Temperatures. We will achieve this through the successful implementation of the following:
 - Regular audits of Resuscitation trolley checks and fridge temperatures as part of the Nursing SNAP audits triangulated by Pharmacy audit for the safe and secure handling of medicines
 - Development of a SOP for temperature checks, escalation and subsequent action.
 - Development of an equipment replacement programme and identification of a minor equipment budget.
 - · Review and update the Asset Register within Radiology
 - Audit of all electrical equipment safety checks.
- 3. Ensure our Healthcare Records are stored securely. We will do this through the successful implementation of the following:
 - Conduct a review of all areas where health records are stored ensuring safe and secure storage is provided.
- **4.** Improve our compliance with Infection prevention and control procedures. We will do this through the successful implementation of the following:
 - A follow up peer review visit to take place within 3 months, to include NHSI and NICE colleagues- implement recommendations following review.
 - Re-establishment of the Anti-microbial Stewardship Group
 - Monthly monitoring of all relevant statutory requirements (e.g. water and ventilation requirements) via the Trust Infection Prevention and Control Group.
- 5. Improve our staff knowledge in caring for all vulnerable patient groups and ensure provision of an appropriate environment at all times. We will do this through the successful implementation of the following:
 - Training needs analysis and review of current training packages provided
 - Divisions to set and deliver improvement trajectories on mandatory training specifically in relation to Safeguarding, FGM, Domestic Violence, MCA and DOLS. This will be monitored via Performance Reviews.
 - Review of mental health rooms within ED, undertaking a ligature risk assessment.
 - Establish a standardised process for conducting Harm Reviews and establish a group to oversee outcomes of reviews.
 - Review of procedures for implementing the "5 Steps to Safe Surgery" guidance.

We will know when we have succeeded when we have demonstrated

Outcomes	*Theme Achievement Date
Compliance with mandatory training standards	
Positive audit results relating to healthcare records storage, medicines administration and storage, fridge temperature	31/03/18
checks and ligature assessments.	
Full compliance with mandatory training with staff able to describe the care needed for vulnerable patient groups.	
All divisions have up to date asset registers and an equipment replacement programme	
A reduction in incidents relating to incorrect storage of medicines	
Regular communication of lessons learnt from incidents relating to medicines	
Patients get the care required through early identification of risk as part of the Harm review process.	
SNAP and Observational audits demonstrate robust hand hygiene and compliance with PPE	
Outbreak RCA's demonstrating effective isolation management.	
Decreasing C.Diff cases and achievement of improvement trajectory	

^{*} Each project will have rolling milestones and Key Performance Indicators (KPI's) that will reported on monthly

The Plan - 0	Culture and	Workforce	Executive Lead -	Chief Executive	Officer
- 1 1 1 G 1 1 G 1 1 - V	Juitui 6 aiiu	TTOIRIOICE.	LACCULIVE LEGG -	OHIGH EXCOUNT	

What the CQC found

The Executive team at the time were made up of mainly interim executive directors who were not recognisable or visible to staff through the Trust.	Staffing levels within the emergency department were not planned and reviewed in line with national guidance. There were not enough consultants to meet the RCEM recommendations. However, most other areas had adequate staff to ensure patients received safe care and treatment.
There were not effective processes in place to ensure communication was embedded from ward to Board.	Staff did not feel valued or listened to by divisional and executive
	teams
The trust has poor performance in the NHS Staff survey	Nursing staff competency records in some departments were out of date.
The rates of bullying for both black and minority ethnic and white staff from patients, relatives and the public along with other staff were high and represented a significant risk to patient care.	There was not a Freedom to Speak up Guardian in place.
The Trust staff appraisal rate was below the Trust standard of 90%	

Our plans to improve

- 1. Implement a cultural change programme that embeds signature behaviours and creates a greater sense of accountability within the Trust. We will do this through the successful implementation of the following:
- Identification of signature behaviours
- Roll out of the Pulse cultural change programme with surveys of all staff three times a year
- Measurement of net leadership score for Board and Executive three times a year
- 2 Improve the recruitment and retention of our staff. We will do this through the successful implementation of the following:
- Development and implementation of a comprehensive recruitment strategy with a particular focus on medical staff recruitment.
- Undertake an overseas recruitment trip to India for medical staff in July.
- Development of a workforce strategy that focusses on retention, leadership development and development of new roles.
- Taking part in the NHSI supported programme for developing the role of Advanced Care Practitioners

- Explore reward and recognition schemes as part of the Pulse programme.
- Undertake 6 monthly staffing reviews in order to ensure the correct skill mix and staffing numbers.
- Working with STP partners in exploring development of roles to work across boundaries and organisations.
- Strengthen the Trust links with Health Education England.
- Strengthen the appraisal process, enhancing the quality of that process, whilst improving compliance across the Trust
- Implement a robust process for clinical supervision; ensuring staff have time to participate.
- Learn from best practice e.g. the Retention Programme at UCLH.
- Divisions to ensure all staff are up to date with their competency frameworks, monitored via Divisional Boards.
- 3 Improve how we engage with our staff to help us to deliver the best possible care to the local population. We will do this through the successful implementation of the following:
- Hold staff discussion forums to better understand how we can improve our communications from ward to board.
- Sustain the Senior Nurse profile in all clinical areas to ensure support to frontline staff (in line with Statement of Intent)
- Increase the use of social media to engage with staff.
- Increase Board visibility through leadership walk-abouts
- Employ an independent Freedom to Speak Up champion and ensure systems are embedded that encourage and support staff to raise concerns.
- Review and re-launch the trust Equality and Diversity Group.
- Establish a Workforce Board Committee.

We will know when we have succeeded when we have demonstrated:

Outcomes	*Theme
	Achievement Date
Reduction in vacancy rates against 16/17 rates	
Improvement in turnover rates to bring them in line with the national average	31/03/18
Improvement in staff FFT and the national staff survey against the 16/17 rates.	
Improvement in net leadership score	

^{*} Each project will have rolling milestones and Key Performance Indicators (KPI's) that will reported on monthly
