

Worcestershire County Council Public Health Impact Assessment Process

The following process has been developed following the decision by Cabinet to review all policies and reports against the potential impact they can have on Public health outcomes across the County. Whenever a new policy or report for cabinet is being developed, this process should be followed in order to determine the potential impact on health.

This sits alongside a more detailed process report, which sets out a more detailed Public Health impact assessment to be used following the attached screening template where necessary.

The attached screening template has been developed to assist the local authority and its partners to embed health impact assessments into all policy decisions. This is intended to provide guidance to all partners when considering new developments, strategies and action plans. It is designed to be quick and simple to complete and contains prompts to assist with the Health Impact Assessment process as part of policy making. It is termed an 'HIA Policy Process template'.

Worcestershire Public health Impact Assessment Screening Template

Description and aims of the policy/report:

The Cabinet Resources Report details the forecast financial results for the end of 2016/17 after two months of actual information and ten months of forecast information.

It also provides a brief update of the Council's Futurefit savings programme financial forecast for 2016/17 and gives a brief note with regard to the progress of the Annual statutory accounts process

There are two new spending decisions requested in the September 2016 Cabinet Resources Report:-

- recommends that Council approve the Energy Efficiency Spend to Save Fund increase to the capital programme and the capital budget cash limits be updated accordingly
- recommends that Council approves the addition of £2 million to the Capital Programme for Phase 2 of the development of in-house Post-16 Supported Living Accommodation and residential facilities within Children's Services to be funded by revenue savings from the projects

This will enable further capital investment in energy efficiency projects including lighting, insulation and the installation of renewable technology across the Council's property estate and street lighting portfolio, and to develop in house residential service provision to support the Childrens Placements Budget

There are no specific considerations for Public Health with regard to the report

Relevant local and national policies:

None specific

County or district policy:

Financial Regulations
Annual Full Council approved budget and capital programme

Population affected:

All Worcestershire, and specific staff and pupils of schools

Who are the main stakeholders and how will they be involved?

All Worcestershire, and specific staff and pupils of schools
