# **BCF Planning Template 2022-23**

#### 1. Guidance

#### Overview

### Note on entering information into this template

Throughout the template, cells which are open for input have a yellow background and those that are pre-populated have a blue background, as below:

Data needs inputting in the cell

Pre-populated cells

### Note on viewing the sheets optimally

For a more optimal view each of the sheets and in particular the drop down lists clearly on screen, please change the zoom level between 90% - 100%. Most drop downs are also available to view as lists within the relevant sheet or in the guidance sheet for readability if required.

The details of each sheet within the template are outlined below.

### **Checklist** (click to go to Checklist, included in the Cover sheet)

- 1. This section helps identify the sheets that have not been completed. All fields that appear as incomplete should be completed before sending to the Better Care Fund Team.
- 2. The checker column, which can be found on the individual sheets, updates automatically as questions are completed. It will appear 'Red' and contain the word 'No' if the information has not been completed. Once completed the checker column will change to 'Green' and contain the word 'Yes'
- 3. The 'sheet completed' cell will update when all 'checker' values for the sheet are green containing the word 'Yes'.
- 4. Once the checker column contains all cells marked 'Yes' the 'Incomplete Template' cell (below the title) will change to 'Template Complete'.
- 5. Please ensure that all boxes on the checklist are green before submission.

### 2. Cover (click to go to sheet)

- 1. The cover sheet provides essential information on the area for which the template is being completed, contacts and sign off.
- Question completion tracks the number of questions that have been completed; when all the questions in each section of the template have been completed the cell will turn green. Only when all cells are green should the template be sent to the Better Care Fund Team: england.bettercarefundteam@nhs.net (please also copy in your Better Care Manager).

#### 4. Income (click to go to sheet)

- 1. This sheet should be used to specify all funding contributions to the Health and Wellbeing Board's (HWB) Better Care Fund (BCF) plan and pooled budget for 2022-23. It will be pre-populated with the minimum NHS contributions to the BCF, Disabled Facilities Grant (DFG) and improved Better Care Fund (iBCF). These cannot be edited
- 2. Please select whether any additional contributions to the BCF pool are being made from local authorities or ICBs and enter the amounts in the fields highlighted in 'yellow'. These will appear as funding sources in sheet 5a when you planning expenditure.
- 3. Please use the comment boxes alongside to add any specific detail around this additional contribution.
- 4. If you are pooling any funding carried over from 2021-22 (i.e. underspends from BCF mandatory contributions) you should show these on a separate line to the other additional contributions and use the comments field to identify that these are underspends that have been rolled forward. All allocations are rounded to the nearest pound.
- 5. Allocations of the NHS minimum contribution (formerly CCG minimum) are shown as allocations from ICB to the HWB area in question. Mapping of the allocations from former CCGs to HWBs can be found in the BCF allocation spreadsheet on the BCF section of the NHS England Website.
- 6. For any questions regarding the BCF funding allocations, please contact england.bettercarefundteam@nhs.net (please also copy in your Better Care Manager).

## 5. Expenditure (click to go to sheet)

This sheet should be used to set out the detail of schemes that are funded via the BCF plan for the HWB, including amounts, type of activity and funding source. This information is then aggregated and used to analyse the BCF plans nationally and sets the basis for future reporting.

The information in the sheet is also used to calculate total contributions under National Conditions 2 and 3 and is used by assurers to ensure that these are met.

The table is set out to capture a range of information about how schemes are being funded and the types of services they are providing. There may be scenarios when several lines need to be completed in order to fully describe a single scheme or where a scheme is funded by multiple funding streams (eg: iBCF and NHS minimum). In this case please use a consistent scheme ID for each line to ensure integrity of aggregating and analysing schemes.

On this sheet please enter the following information:

### 1. Scheme ID:

- This field only permits numbers. Please enter a number to represent the Scheme ID for the scheme being entered. Please enter the same Scheme ID in this column for any schemes that are described across multiple rows.

### Scheme Name

- This is a free text field to aid identification during the planning process. Please use the scheme name consistently if the scheme is described across multiple lines in line with the scheme ID described above.

### 3. Brief Description of Scheme

- This is a free text field to include a brief headline description of the scheme being planned. The information in this field assists assurers in understanding how funding in the local BCF plan is supporting the objectives of the fund nationally and aims in your local plan.

## 4. Scheme Type and Sub Type:

- Please select the Scheme Type from the drop-down list that best represents the type of scheme being planned. A description of each scheme is available in
- Where the Scheme Types has further options to choose from, the Sub Type column alongside will be editable and turn "yellow". Please select the Sub Type from the drop down list that best describes the scheme being planned.
- Please note that the drop down list has a scroll bar to scroll through the list and all the options may not appear in one view.
- If the scheme is not adequately described by the available options, please choose 'Other' and add a free field description for the scheme type in the column alongside. Please try to use pre-populated scheme types and sub types where possible, as this data is important in assurance and to our understanding of how BCF funding is being used nationally.
- The template includes a field that will inform you when more than 5% of mandatory spend is classed as other.

#### 5. Area of Spend:

- Please select the area of spend from the drop-down list by considering the area of the health and social care system which is most supported by investing in the scheme.
- Please note that where 'Social Care' is selected and the source of funding is "NHS minimum" then the planned spend would count towards National Condition 2
- If the scheme is not adequately described by the available options, please choose 'Other' and add a free field description for the scheme type in the column alongside.
- We encourage areas to try to use the standard scheme types where possible.

#### 6. Commissioner:

- Identify the commissioning body for the scheme based on who is responsible for commissioning the scheme from the provider.
- Please note this field is utilised in the calculations for meeting National Condition 3. Any spend that is from the funding source 'NHS minimum contribution', is commissioned by the ICB, and where the spend area is not 'acute care', will contribute to the total spend under National Condition 3. This will include expenditure that is ICB commissioned and classed as 'social care'.
- If the scheme is commissioned jointly, please select 'Joint'. Please estimate the proportion of the scheme being commissioned by the local authority and NHS and enter the respective percentages on the two columns.

#### 7. Provider:

- Please select the type of provider commissioned to provide the scheme from the drop-down list.
- If the scheme is being provided by multiple providers, please split the scheme across multiple lines.

#### 8. Source of Funding:

- Based on the funding sources for the BCF pool for the HWB, please select the source of funding for the scheme from the drop down list. This includes additional, voluntarily pooled contributions from either the ICB or Local authority
- If a scheme is funded from multiple sources of funding, please split the scheme across multiple lines, reflecting the financial contribution from each.

## 9. Expenditure (£) 2022-23:

- Please enter the planned spend for the scheme (or the scheme line, if the scheme is expressed across multiple lines)
- 10. New/Existing Scheme
- Please indicate whether the planned scheme is a new scheme for this year or an existing scheme being carried forward.

This is the only detailed information on BCF schemes being collected centrally for 2022-23 and will inform the understanding of planned spend for the iBCF grant and spend from BCF sources on discharge.

## **6. Metrics** (click to go to sheet)

This sheet should be used to set out the HWB's ambitions (i.e. numerical trajectories) and performance plans for each of the BCF metrics in 2022-23. The BCF policy requires trajectories and plans agreed for the fund's metrics. Systems should review current performance and set realistic, but stretching ambitions for 2022-23.

A data pack showing more up to date breakdowns of data for the discharge to usual place of residence and unplanned admissions for ambulatory care sensitive conditions is available on the Better Care Exchange.

For each metric, areas should include narratives that describe:

- a rationale for the ambition set, based on current and recent data, planned activity and expected demand
- the local plan for improving performance on this metric and meeting the ambitions through the year. This should include changes to commissioned services, joint working and how BCF funded services will support this.
- 1. Unplanned admissions for chronic ambulatory care sensitive conditions:
- This section requires the area to input indirectly standardised rate (ISR) of admissions per 100,000 population by quarter in 2022-23. This will be based on NHS Outcomes Framework indicator 2.3i but using latest available population data.
- The indicator value is calculated using the indirectly standardised rate of admission per 100,000, standardised by age and gender to the national figures in reference year 2011. This is calculated by working out the SAR (observed admission/expected admissions\*100) and multiplying by the crude rate for the reference year. The expected value is the observed rate during the reference year multiplied by the population of the breakdown of the year in question.
- The population data used is the latest available at the time of writing (2020)
- Actual performance for each quarter of 2021-22 are pre-populated in the template and will display once the local authority has been selected in the drop down box on the Cover sheet.
- Exact script used to pull pre-populated data can be found on the BCX along with the methodology used to produce the indicator value:

- Technical definitions for the guidance can be found here:

https://digital.nhs.uk/data-and-information/publications/statistical/nhs-outcomes-framework/march-2022/domain-2---enhancing-quality-of-life-for-people-with-long-term-conditions-nof/2.3.i-unplanned-hospitalisation-for-chronic-ambulatory-care-sensitive-conditions

- 2. Discharge to normal place of residence.
- Areas should agree ambitions for the percentage of people who are discharged to their normal place of residence following an inpatient stay. In 2021-22, areas were asked to set a planned percentage of discharge to the person's usual place of residence for the year as a whole. In 2022-23 areas should agree a rate for each quarter.
- The ambition should be set for the health and wellbeing board area. The data for this metric is obtained from the Secondary Uses Service (SUS) database and is collected at hospital trust. A breakdown of data from SUS by local authority of residence has been made available on the Better Care Exchange to assist areas to set ambitions.
- Ambitions should be set as the percentage of all discharges where the destination of discharge is the person's usual place of residence.
- Actual performance for each quarter of 2021-22 are pre-populated in the template and will display once the local authority has been selected in the drop down box on the Cover sheet.
- 3. Residential Admissions (RES) planning:
- This section requires inputting the expected numerator of the measure only.
- Please enter the planned number of council-supported older people (aged 65 and over) whose long-term support needs will be met by a change of setting to residential and nursing care during the year (excluding transfers between residential and nursing care)
- Column H asks for an estimated actual performance against this metric in 2021-22. Data for this metric is not published until October, but local authorities will collect and submit this data as part of their salt returns in July. You should use this data to populate the estimated data in column H.
- The prepopulated denominator of the measure is the size of the older people population in the area (aged 65 and over) taken from Office for National Statistics (ONS) subnational population projections.
- The annual rate is then calculated and populated based on the entered information.

### 4. Reablement planning:

- This section requires inputting the information for the numerator and denominator of the measure.
- Please enter the planned denominator figure, which is the planned number of older people discharged from hospital to their own home for rehabilitation (or from hospital to a residential or nursing care home or extra care housing for rehabilitation, with a clear intention that they will move on/back to their own home).
- Please then enter the planned numerator figure, which is the expected number of older people discharged from hospital to their own home for rehabilitation (from within the denominator) that will still be at home 91 days after discharge.
- Column H asks for an estimated actual performance against this metric in 2021-22. Data for this metric is not published until October, but local authorities will collect and submit this data as part of their salt returns in July. You should use this data to populate the estimated data in column H.
- The annual proportion (%) Reablement measure will then be calculated and populated based on this information.

## 7. Planning Requirements (click to go to sheet)

This sheet requires the Health and Wellbeing Board to confirm whether the National Conditions and other Planning Requirements detailed in the BCF Policy Framework and the BCF Requirements document are met. Please refer to the BCF Policy Framework and BCF Planning Requirements documents for 2022-23 for further details.

The sheet also sets out where evidence for each Key Line of Enquiry (KLOE) will be taken from.

The KLOEs underpinning the Planning Requirements are also provided for reference as they will be utilised to assure plans by the regional assurance panel.

- 1. For each Planning Requirement please select 'Yes' or 'No' to confirm whether the requirement is met for the BCF Plan.
- 2. Where the confirmation selected is 'No', please use the comments boxes to include the actions in place towards meeting the requirement and the target timeframes.

Checklist

11	Bed based intermediate Care Services	1. Step down (discharge to assess pathway-2) 2. Step up 3. Rapid/Crisis Response 4. Other	Short-term intervention to preserve the independence of people who might otherwise face unnecessarily prolonged hospital stays or avoidable admission to hospital or residential care. The care is person-centred and often delivered by a combination of professional groups. Four service models of intermediate care are: bed-based intermediate care, crisis or rapid response (including falls), home-based intermediate care, and reablement or rehabilitation. Home-based intermediate care is covered in Scheme-A and the other three models are available on the sub-types.
12	Reablement in a persons own home	Preventing admissions to acute setting     Reablement to support discharge-step down (Discharge to Assess pathway 1)     Rapid/Crisis Response - step up (2 hr response)     Reablement service accepting community and discharge referrals     Other	Provides support in your own home to improve your confidence and ability to live as independently as possible
13	Personalised Budgeting and Commissioning		Various person centred approaches to commissioning and budgeting, including direct payments.
14	Personalised Care at Home	Mental health /wellbeing     Physical health/wellbeing     Other	Schemes specifically designed to ensure that a person can continue to live at home, through the provision of health related support at home often complemented with support for home care needs or mental health needs. This could include promoting self-management/expert patient, establishment of home ward for intensive period or to deliver support over the longer term to maintain independence or offer end of life care for people. Intermediate care services provide shorter term support and care interventions as opposed to the ongoing support provided in this scheme type.
15	Prevention / Early Intervention	Social Prescribing     Risk Stratification     Choice Policy     Other	Services or schemes where the population or identified high-risk groups are empowered and activated to live well in the holistic sense thereby helping prevent people from entering the care system in the first place. These are essentially upstream prevention initiatives to promote independence and well being.
16	Residential Placements	Supported living     Supported accommodation     Supported accommodation     Substitution of the support of accommodation     Substitution of the support of accommodation of the support of the support of accommodation of the support of the s	Residential placements provide accommodation for people with learning or physical disabilities, mental health difficilities or with sight or hearing loss, who need more intensive or specialised support than can be provided at home.
18	Other		Where the scheme is not adequately represented by the above scheme types, please outline the objectives and services planned for the scheme in a short description in the comments column.

6. Metrics

Selected Health and Wellbeing Board: Worcestershire

#### 8.1 Avoidable admission

	2021-22 Q1 Actua	2021-22 Q2 Actual			Rationale for how ambition was set	Local plan to meet ambition
Indirectly standardised rate (ISR) of admissions per Indicator value	169.4	161.6	176.8	144.9	•	The priorities set out within the narrative
100,000 population	2022-23 Q1	2022-23 Q2	2022-23 Q3	2022-23 Q4		plan identify ambitions to support
	Plar	Plan	Plan	Plan		Worcestershire residents to remain at
(See Guidance)						home and maintain independence for as
Indicator valu	169	162	177	145		long as possible in order to meet this

>> link to NHS Digital webpage (for more detailed guidance)

#### 8.3 Discharge to usual place of residence

		2021-22 Q1	2021-22 Q2	2021-22 Q3	2021-22 Q4		
		Actual	Actual	Actual	Actual	Rationale for how ambition was set	Local plan to meet ambition
	Quarter (%)	91.3%	91.7%	91.3%			The ambition is to continue to improve
	Numerator	10,656	10,661	10,390	9,860		performance to match the national
Percentage of people, resident in the HWB, who are discharged from acute hospital to their normal	Denominator	11,666	11,629	11,380	10,871		average. Continual development of the integrated care team is outlined within the

place of residence		Plan	Plan	Plan	Plan		
(SUS data - available on the Better Care Exchange)	Quarter (%)	90.5%	90.8%	90.5%	89.8%		
(303 data available on the better care exchange)	Numerator	10,156	10,163	9,911	9,387		
	Denominator	11,224	11,191	10,957	10,448		

#### 8.4 Residential Admissions

		2020-21 Actual			Rationale for how ambition was set	Local plan to meet ambition
1 to	Annual Rate	475.8	573.8	572.4		Extensive scrutiny of all placements in long term care; all alternative provision
Long-term support needs of older people (age 65 and over) met by admission to residential and nursing care homes, per 100,000 population	Numerator	654	806	804	population figure to ASCOF definition so rates will vary.	considered as first option
nursing care nomes, per 100,000 population	Denominator	137,439	140,470	140,470	Target set based on a 5% estimated increased around demand pressures.	

Long-term support needs of older people (age 65 and over) met by admission to residential and nursing care homes, per 100,000 population (aged 65+) population projections are based on a calendar year using the 2018 based Sub-National Population Projections for Local Authorities in England:

https://www.ons.gov.uk/releases/subnationalpopulationprojectionsforengland2018based

#### 8.5 Reablement

			2020-21 Actual	2021-22 Plan				Local plan to meet ambition
							Previous target maintained as challenging	Concentrated efforts to ensure
	roportion of older people (65 and over) who were	Annual (%)	81.8%	82.1%	80.8%	82.0%	to meet due to increased complexity of	reablement needs prioritised
	till at home 91 days after discharge from hospital						people's needs	
	nto reablement / rehabilitation services	Numerator	453	455	497	504		
"	ito readientent / renadintation services							
		Denominator	554	554	615	615		

Please note that due to the demerging of Northamptonshire, information from previous years will not reflect the present geographies.

As such, the following adjustments have been made for the pre-populated figures above:

- 2020-21 actuals (for **Residential Admissions** and **Reablement**) for <u>North Northamptonshire</u> and <u>West Northamptonshire</u> are using the <u>Northamptonshire</u> combined figure;
- 2021-22 and 2022-23 population projections (i.e. the denominator for Residential Admissions) have been calculated from a ratio based on the 2020-21 estimates.
